Extension of Existing Interim Orders Granting Protection under the Semiconductor Chip Protection Act of 1984 for Nationals, Domiciliaries and Sovereign Authorities of Certain Countries to Which Interim Protection Has Been Extended [Docket No. 921111-2311]

Agency: Patent and Trademark Office, Commerce
Action: Notice
Summary: Pursuant to section 914 of the Semiconductor Chip Protection Act of 1984 (SCPA), 17 U.S.C. 914, and the guidelines issued by the Patent and Trademark Office, 49 FR 44517 (Nov. 7, 1984), the Acting Assistant Secretary and Acting Commissioner of Patents and Trademarks has determined that existing interim orders should be extended in duration for nationals, domiciliaries and sovereign authorities of Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland, Finland, and Austria under section 914 of the SCPA.
Effective Date: This order is effective on Nov. 5, 1992.
Termination Date: This order will terminate on July 1, 1994.
Addresses: Address correspondence to Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Box 4, Washington, D.C. 20231.
For Further Information Contact: Michael K. Kirk, Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Box 4, Washington, D.C. 20231, phone (703) 305-9300.
Supplementary Information: When Congress enacted the Semiconductor Chip Protection Act of 1984 (SCPA) it established an entirely new category of intellectual property that did not fall under the Paris Convention for the Protection of Industrial Property, the Universal Copyright Convention or the Berne Convention for the Protection of Literary and Artistic Works. The Congress created a balanced intellectual property regime for the protection of layout-designs of semiconductor chips that provided a level of protection that was satisfactory to meet the needs of the U.S. public and the domestic semiconductor chip industry. At the same time, Congress was also aware of the need of U.S. chip producers for protection in foreign markets, of the need of foreign chip producers for protection here in the United States and that there was no international treaty for the protection of chips. Faced with this dilemma, Congress created an innovative mechanism to encourage the rapid building of a worldwide consensus on an appropriate regime of intellectual property protection for chip layout-designs that would be compatible with U.S. law and would encourage the development of the international market for semiconductor chip products. To achieve these goals, Congress established a two-tiered system for protecting foreign works in the United States. Section 914 of the SCPA permits the Secretary of Commerce to extend interim access to protection under the SCPA for foreign chip creators if certain criteria are met, and section 902 permits the President to proclaim indefinite access to protection under the SCPA for foreign creators from countries that protect U.S. works. This system has laid the groundwork for establishing a technology-specific, carefully-tailored and balanced regime of mask work protection in other chip-producing countries.

Section 902 of the SCPA sets out the criteria under which foreign works are eligible for protection in the United States. Section 902(a)(1) provides that:

> Subject to the provisions of subsection (b), a mask work fixed in a semiconductor chip product, by or under the authority of the owner if the mask work, is eligible for protection under this chapter if—
>
> (A) on the date on which the mask work is registered under section 908, or is first commercially exploited anywhere in the world, whichever occurs first, the owner of the mask work is (i) a national or domiciliary of the United States, (ii) a national, domiciliary or sovereign authority of a foreign nation that is a party to a treaty affording protection to mask works to which the United States is also a party, or (iii) a stateless person wherever that person may be domiciled;
>
> (B) the mask work is first commercially exploited in the United States; or
>
> (C) the mask work comes within the scope of a Presidential proclamation issued under paragraph (2).

Section 902(a)(2) sets out the statutory criteria against which foreign laws are to be evaluated before issuing a Presidential proclamation. It provides that:

> Whenever the President finds that a foreign nation extends, to mask works of owners who are nationals or domiciliaries of the United States protection (A) on substantially the same basis as that on which the foreign nation extends protection to mask works of its own nationals and domiciliaries and mask works first commercially exploited in that nation, or (B) on substantially the same basis as provided in this chapter, the President may by proclamation extend protection under this chapter to mask works (i) of owners who are, on the date on which the mask works are registered under section 908, or the date on which the mask works are first commercially exploited anywhere in the world, whichever occurs first, nationals, domiciliaries, or sovereign authorities of that nation, or (ii) which are first commercially exploited in that nation.

In 1987 the Chairman of the then House Subcommittee on Courts, Civil Liberties and the Administration of Justice noted that the transition provisions in section 914 of the SCPA were "intended to encourage the rapid development of a new worldwide regime for the protection of semiconductor chips." 133

Cong. Rec. E1283 (daily ed. Apr. 6, 1987). These transitional provisions empowered the Executive to use the issuance of interim protection orders under section 914 of the SCPA as a means to encourage other nations to move speedily to establish substantially similar systems of protection. These provisions originally were set to expire three years after the date of the enactment of the SCPA, Nov. 7, 1987.

The Congress has twice extended the authority to issue interim orders in the belief that this process is promoting the protection of U.S. mask works abroad and that the speedy enactment of laws in other countries that are patterned after U.S. law is progress. H.R. Rep. 100-388, 100th Cong., 1st Sess. (1987). Under the SCPA, the Assistant Secretary and Commissioner of Patents and Trademarks has been delegated the tasks of determining when and under what conditions foreign mask works will be eligible for interim protection. To become eligible, a foreign government must demonstrate that it is making good faith efforts toward establishing a regime of protection in its territory that is substantially similar to that which is provided in the United States under the SCPA.

The countries to which interim protection has been extended (the Member States of the European Community, Australia, Austria, Canada, Finland, Japan, Sweden, and Switzerland) cooperated with the United States to try to establish a treaty for the adequate and effective protection of mask works in the World Intellectual Property Organization (WIPO). A Diplomatic Conference for the negotiation of a Treaty on the Protection of the Layout-Designs of Integrated Circuits was held in Washington during the month of May 1989. The Treaty adopted at the conclusion of the Conference did not meet the needs of either Japan or the United States. No developed country has signed the Treaty, and it is yet to come into force.

Subsequent to the Diplomatic Conference, the United States has continued to work to conclude a multilateral agreement for the adequate and effective protection of semiconductor integrated circuit layout-designs. The Dec. 20, 1991, text on the Trade Related Aspects of Intellectual Property (TRIPS) in the Uruguay Round of Trade negotiations in the General Agreement on Tariffs and Trade contains a section that will require such protection. It builds upon the substantive provisions of the WIPO Treaty and adds the missing features deemed necessary to provide an adequate level of protection. The countries to which interim protection has been extended all worked closely with the United States to achieve this goal. However, the TRIPS Agreement has not yet been concluded, and the presently issued interim orders will expire on Dec. 31, 1992, before the TRIPS Agreement could possibly come into force.

The combination of the standards set out in section 902 and the process established to implement section 914 clearly appear to have satisfied the Congressional intent behind this unprecedented process. In 1984, only the United States had specific legislation in place for the protection of chips, while today such protection is in place in all of the countries to which interim protection has been extended. U.S. semiconductor chip layout-designs enjoy protection in all of those countries today. In some, the protection is enjoyed on the basis of national treatment and in some on the basis of reciprocity.

Since the interim orders were last extended, no complaints about the adequacy of the mask work protection laws in any of the countries to which interim protection has been extended have been received. Should such complaints arise in the future, they can be taken into account in determining whether a particular interim order should be rescinded prior to its scheduled termination.

Because of this favorable environment, and in order to ensure the continuing protection of U.S. layout-designs in foreign markets, I have determined that extending the present interim orders will continue the incentive to work toward a successful conclusion of the TRIPS Agreement or another international agreement which will provide the basis for an adequate and effective multinational system for the protection for semiconductor mask works. In light of this, I am extending the interim orders for Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland, Finland and Austria under Section 914 of the SCPA. These orders will expire on July 1, 1994.

Changes in Practice Relating to Filing Patent Applications

Agency: Patent and Trademark Office, Commerce.
Action: Final Rule.
Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases to provide a uniform practice with respect to filing an oath or declaration and filing fees in continuing applications.
Effective Date: Jan. 4, 1993. These rules will be applicable to all papers and applications filed with the Office on or after the effective date.
For Further Information Contact: Jeffrey V. Nase by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.
Supplementary Information: In a Notice of Proposed Rulemaking published in the *Federal Register* (57 FR 31344) on July 15, 1992, and in the Patent and Trademark Office *Official Gazette* (1141 Off. Gaz. Pat. Office 9) on Aug. 4, 1992, the Office proposed to amend § 1.60. The due date for submitting written comments was extended to Sept. 10, 1992, in an Extension of Comment Period published in the *Federal Register* (57 FR 38640) on Aug. 26, 1992.

One comment was received. The comment favored adoption of the proposed rule changes.

A continuation or divisional application filed under § 1.60 did not receive a filing date until a complete copy of the prior application was filed, including a true copy of the oath or declaration. Since the Office is in possession of the oath or declaration of the prior application, § 1.60 is being modified to be consistent with §§ 1.53 and 1.62 by permitting filing of a true copy of the oath or declaration within a time specified in a notice of missing parts mailed by the Office.

The specific revisions are discussed below:

(1) Correction of inventorship (§ 1.48)

Section 1.48(a) is amended to replace the designation by letter of various requirements therein with numbered designations so as to avoid confusion when making reference to this section.

(2) Procedures for completing applications filed under § 1.60

Section 1.60 outlines one of the procedures that may be followed by applicants to file a continuation or divisional application. One of the requirements under this section is that applicants file a true copy of the complete parent application as filed, including the oath or declaration. Paragraph (c) of this section had specified that a filing date would not be granted if applicant failed to file a complete application under this section. When the missing item was filed, a filing date was granted as of the date of receipt of the missing item. Practice under § 1.60 is being modified to be similar to the procedures for filing continuing applications under § 1.53(d) and continuation-in-part applications under § 1.62. More specifically, a new paragraph (d) is added in § 1.60 to indicate that if an application filed pursuant to § 1.60(b) is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, a filing date will be granted. The copy of the oath or declaration, as well as payment of the appropriate filing fee must be submitted within a time period specified in a notice of missing parts mailed by the Office. In a manner similar to the practice under §§ 1.53(d) and 1.62(d), the appropriate oath or declaration and/or filing fee as well as the surcharge set forth in § 1.16(e) must be filed within the time period specified in the notice of missing parts in order to avoid abandonment of the application. Paragraphs (b) and (c) of this section are amended to make reference to the exception specified in paragraph (d) discussed above.

OTHER CONSIDERATIONS

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these rule changes will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these changes is to accord a filing date to certain continuing applications which, through oversight, fail to include certain papers which can be submitted after the filing date.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions because most of the changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no record keeping or reporting requirements within the coverage of the Act are placed upon the public.

List of Subjects
37 CFR Part 1

Administrative practice and procedure, Freedom of information, Inventions and patents, Reporting and record keeping requirements.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. 6, part 1 of title 37 of the Code of Federal Regulations is amended as set forth below.

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:
Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.48, paragraph (a) is revised to read as follows:

§ 1.48 Correction of inventorship

(a) If the correct inventor or inventors are not named in an application for patent through error without any deceptive intention on the part of the actual inventor or inventors, the application may be amended to name only the actual inventor or inventors. Such amendment must be diligently made and must be accompanied by:

(1) a petition including a statement of facts verified by the original named inventor or inventors establishing when the error without deceptive intention was discovered and how it occurred;

(2) an oath or declaration by each actual inventor or inventors as required by § 1.63;

(3) the fee set forth in § 1.17(h); and

(4) the written consent of any assignee.

When the application is involved in an interference, the petition shall comply with the requirements of this section and shall be accompanied by a motion under § 1.634.

*****

3. In Section 1.60, paragraphs (b) and (c) are revised and paragraph (d) is added to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

*****

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 and 121 and § 1.78(a)) if:

(1) the prior application was a complete application as set forth in § 1.51(a),

(2) applicant indicates that the application is being filed pursuant to this section and files a true copy of the prior complete application as filed including the specification (with claims), drawings, oath or declaration showing the signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application,

(3) the inventors named in the continuation or divisional application are the same or less than all the inventors named in the prior application, and

(4) the application is filed before the patenting or abandonment of or termination of proceedings on the prior application. The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (1.78(a)) will be entered before calculating the filing fee and granted the filing date. If the continuation or divisional application is filed by less than all the inventors named in the prior application, a statement must accompany the application when filed requesting deletion of the names of the person or persons who are not inventors of the invention being claimed in the continuation or divisional application. Except as provided in paragraph (d) of this section, if a true copy of the prior application as filed is not filed with the application or if the statement that the application papers are a true copy is omitted, the application will not be given a filing date earlier than the date upon which the copy and statement are filed, unless a petition with the fee set forth in § 1.17(i)(1) is filed which satisfactorily explains the delay in filing these items.

(c) if an application filed pursuant to paragraph (b) of this section is incomplete for reasons other than those specified in paragraph (d) of this section, applicant will be notified and given a time period within which to complete the application in order to obtain a filing date as of the date of filing the omitted item provided the omitted item is filed before the patenting or abandonment of or termination or proceedings on the prior application. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n)

(d) If an application filed pursuant to paragraph (b) of this section is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, showing the signature or an indication it was signed, a filing date will be granted and applicant will be so notified and given a period of time within which to file the fee, or the true copy of the oath or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this paragraph may be made simultaneously with any notification pursuant to paragraph (c) of this section.

Electronic Filing of Patent and Trademark Applications

Agency: Patent and Trademark Office Commerce
Action: Advance Notice of Proposed Rulemaking

Summary: This advance notice of proposed rulemaking is to inform the public that the Patent and Trademark office (PTO) is considering amending its rules of practice: (1) to allow for electronic filing of patent applications and trademark applications; and (2) to require applications filed in paper form to follow a prescribed order and format.

The PTO anticipates that permitting electronic filing of applications will improve the accuracy of the information relied upon in the examination of patent and trademark applications, eliminate delays caused by mailing and data entry, and, as a first step toward a fully-automated processing system, ultimately provide considerable cost savings. The cost savings realized could be used to help reduce the need for future fee adjustments and/or fund improvements in the delivery of services. Requiring applications filed on paper to follow a prescribed order and format will enable the PTO to convert these applications to electronic format.

The purposes of this notice are to: (1) invite interested parties to participate in pilot programs involving electronic filing of patent and trademark applications; and (2) encourage comments on this topic, in the form of responses to the questions posed in this notice, from industry, the patent and trademark bars, and members of the public

Dates: Comments should be received on or before Feb. 28, 1993.

Addresses: Written comments should be addressed, if sent by mail, to the attention of Edward R. Kazenske, Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, c/o Commissioner of Patents and Trademarks, Washington, D.C. 20231. If delivered by hand, comments should be brought to the Office of the Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, Room 906, Crystal Park 2, 2121 Crystal Drive, Arlington, Va.

For Further Information Contact: Edward R. Kazenske, Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, (703) 305-8600.

SUPPLEMENTARY INFORMATION:

1. Pilot Programs

Currently, the PTO accepts patent and trademark applications delivered by mail or in person. These applications are in paper form or, in the case of patent applications for nucleotide sequences, a combination of computer-readable (see 37 CFR 1.821-1.825) and paper form.

The PTO is initiating a pilot program that would permit electronic filing of patent and trademark applications, using software now under consideration by the PTO. Initially, it is anticipated that participants in the pilot program would be required to use the PTO software to create a diskette, which would then be mailed to the PTO along with the paper application generated by the diskette. The diskette would serve the limited function of eliminating the initial data entry of applications into the PTO databases.

As part of a second pilot program, a separate group of participants is being solicited to file paper applications following a prescribed order and format. The paper applications would then be scanned and converted to electronic format. Data collected from the pilot programs will be evaluated to determine whether requiring submission of a paper application in a certain order and format facilitates data entry; whether any modifications to the electronic filing software are required; and more fundamentally, whether electronic filing is a feasible, cost-effective alternative to filing in paper form.

2. Paper Applications

The PTO contemplates that paper applications will be required to follow the order and format of the data elements (e.g., inventor, foreign priority information, in the case of a patent application; applicant, mark, in the case of a trademark application) entered in the electronic filing system. This would enable the PTO to scan and convert paper applications to electronic applications upon receipt at the PTO. Once the paper application is converted into electronic form, processing of the application will be done in a purely electronic format. The electronic form of the application would become the official file.

3. Electronic Filing

The PTO contemplates that applicants filing by electronic means would be required to use an "Authoring Program" developed by the PTO, which will be available to facilitate the preparation of an electronic submission and record the submission on electronic media. This "Authoring Program" will include a validation feature so that applicants, themselves, can test whether an electronic submission complies with all requirements.

The "Authoring Program" software under consideration by the PTO will be designed to be compatible with computers capable of creating files of standard ASCII (American Standard Code for Information interchange) text within one or more of the major operating systems environments (e.g., DOS, Windows®, Unix®, and Apple MacIntosh®).

The format for text in patent applications will specify a set of mandatory data elements, similar to those required under the Patent Cooperation Treaty. The format for text in trademark applications will specify a set of mandatory data elements, similar to those required of a "written application" under 15 U.S.C. 1051. In both the patent and trademark software, specific formats will be required for non-textual elements, such as drawings, formulas, tables and specimens. These non-textual elements would be submitted in separate computer files called "Presentations," similar to the presentation of nucleotide sequence information in accordance with 37 CFR 1.821-1.825.

The PTO also contemplates that certain individuals be designated by the agency as qualified "electronic application transmitters." Upon application to the PTO, unlimited parties meeting specified requirements may be issued Personal Identification Numbers to enable them to transmit applications in electronic form on behalf of themselves or other individuals.

In an effort to facilitate public comment to the questions set forth below, the following background information is provided:

4. Background Specific to Electronic Patent Applications

Signature

Under 35 U.S.C. 111, a patent application must include an oath by the applicant. 35 U.S.C. 25 permits a declaration in lieu of oath. The applicant's signed oath or declaration is not required for receipt of a filing date, but may be submitted, upon payment of a surcharge, within a prescribed period.

Certified Copy of Foreign Patent Application

Under 35 U.S.C. 119, a U.S. patent application may be based on a foreign patent application, thus, potentially, conferring the benefit of the earlier foreign patent application's filing date. A certified copy of the foreign patent application is required to be filed in the PTO before the patent is granted.

5. Background Specific to Electronic trademark Applications

Signature

Under 15 U.S.C. 1051, a trademark application must be verified by the applicant. Prior to implementation of the Trademark Law Revision Act of 1988 (TLRA) on Nov. 16, 1989, the PTO permitted verification of the application to be provided at any time during the examination process. With implementation of the TLRA, the PTO amended its regulations with respect to the verification of an application. 37 CFR 2.21, which sets forth the minimum requirements for an application to receive a filing date, was amended to require that the application be signed by the applicant at the time of filing.

Specimen

Under 15 U.S.C. 1051, a trademark application based on "use in commerce" must include specimens or facsimiles of the mark as used. 37 CFR 2.21(a)(5) requires at least one specimen or facsimile to be included with the "use" application in order to receive a filing date. Applications filed based upon a "bona fide" intention to use the mark in commerce, under 15 U.S.C. 1051(b), must be supplemented with specimens or facsimiles before the

registration issues. In order to meet the minimum requirements for filing an amendment to allege use or statement of use, one specimen or facsimile must be submitted. 37 CFR 2.76(e)(2) and 2.88(e)(2).

Certification or Certified Copy of Foreign Registration

Under 15 U.S.C. 1126(e), "an application [based on a foreign registration] shall be accompanied by a certification or a certified copy of the registration of the country of origin of the applicant." 37 CFR 2.21(a)(5) requires the certification or certified copy to be included with the application in order to receive a filing date.

6. Comments on the following Questions and Any Other Related Matters Are Solicited

Questions Common to Patent and Trademark Applications

a. What benefits do you foresee for the applicant if electronic filing is adopted? What disadvantages do you foresee?
b. Should the PTO require paper applications to be filed in a specific order and format to facilitate conversion to electronic format? What advantages and disadvantages do you foresee?
c. Should the electronic file become the official agency file?
d. Should electronic filing be expanded to encompass amendments and other submissions to the PTO?
e. Should paper or electronic application filings receive a filing date only if they meet order and format requirements, or should compliance be subject to a surcharge?
f. Should the PTO accept electronic filing by diskette, on-line, or both?
g. Should applications filed in paper form be converted to electronic form by the PTO? Should the PTO charge a fee for this service?
h. If paper applications are converted to electronic form by the PTO, should the PTO destroy or retain the paper applications?
i. Should fees be processed electronically?
j. Should the PTO create a registry of "electronic application transmitters" capable of transmitting patent and trademark applications for others? If so, what, if any, criteria should be established before one could be "registered" as an electronic application transmitter?"

Questions Related Solely to Patent Issues

k. Should the PTO require the oath or declaration to an electronically filed patent application be filed on paper to authenticate that applicants believe themselves to be original and first inventors of the subject matter of the electronically filed application?

If not, how should the filing of the oath or declaration be accomplished?

l. How should the filing of certified copies of foreign patent applications be accomplished for an electronically filed patent application?

Questions Related Solely to Trademark Issues

m. Should the PTO require electronically filed applications to include a scanned, signed declaration in order to receive a filing date? Should the PTO accept declarations in electronic form with some type of electronic signature?

If not, should 37 CFR 2.21 be amended to permit unverified applications to be accorded a filing date? if so, within what time period must an unverified application be ratified by the submission of a signed declaration?

How long should the PTO retain the signed declaration after it has been scanned and merged into the electronic file?

n. Should "use" applications submitted without a specimen be given a filing date?

If so, within what time period after filing must the specimens be submitted?

Should the number of required specimens be reduced?

How long should the PTO keep the specimens after they are scanned and merged into the electronic file?

o. Should Section 44(e) of the Trademark Act (15 U.S.C 1126(e)) be amended to permit applicants to submit a facsimile of the certification or certified copy of the foreign registration?

Alternatively, should the statute be amended to permit Section 44(e) applicants to obtain a filing date absent a certification or certified copy of the foreign registration? If so, within what time period must a Section 44(e) application be supplemented with a certificate or certified copy of the foreign registration?

How long should the PTO retain the certification or certified copy after it has been scanned and merged into the electronic application?

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
